1. Essential information

Complete United Portal identity information before travel. The public guide does not promise that on-site KYC will activate an official entrance pass.

Event dates, venues and check-in

AdventureX 2026 runs July 22-26, 2026 at two venues in Yuhang District, Hangzhou:

- Hupan Innovation and Research Center - No. 9 Lixian Road, Yuhang District.
- Hangzhou Future Sci-Tech City Academic Exchange Center - No. 1399 Liangmu Road, Cangqian Subdistrict, Yuhang District.

Participants are encouraged to visit the Academic Exchange Center first for the signature wall and exhibition, then go to Hupan for participant check-in and materials. Complete this before 7:30 pm on July 22 if possible. The absolute deadline is 11:59 pm on July 22.

Most hacking and activities happen at Hupan. The opening ceremony, closing ceremony, Super! Exhibition, participant project Expo and music festival happen at the Academic Exchange Center.

Packing list

Essential

- Physical passport or national ID. A photo or digital copy is not enough for hotel check-in.
- Student ID or proof of student status only if you are older than 26. Participants aged 26 or younger do not need it.
- Your dynamic AdventureX United Portal admission QR. Do not screenshot or share it. A badge will also be issued on site and must be worn at all times.

Recommended

- Phone, laptop, chargers and any hardware you may use for the hack.
- Mainland-China plug adapter if your devices use another standard.
- Change of clothes and a jacket; indoor air-conditioning and the venue at night may be cold.
- Sleeping bag if possible, blanket and eye mask. Shared sleeping bags and mats are reused.
- Umbrella or raincoat; Hangzhou may receive heavy summer rain after typhoons.
- Reusable water bottle. Keep valuables with you; the organizer is not responsible for lost property.

Sleep and free hotel rotation

Free partner-hotel beds are offered to participants aged 26 and under. This is a rotating rest arrangement, similar to an hourly room - not a permanently assigned private room.

- Before the event, complete your legal-name and passport/ID information in United Portal.
- When you need rest, queue in person at the Hupan Hotel Center. There is no mobile reservation.
- Volunteers scan your personal QR. Two participants of the same legal sex share a room. Friends may queue together; solo participants are matched on site.
- Take the hotel order number plus your physical passport/ID to the assigned hotel front desk to receive the key card.
- One stay is limited to 12 hours. After check-out, you cannot apply again for another 12 hours.

- Do not privately swap rooms. Hotel rooms are for rest only; project work is not allowed there.
- Processing opens July 22 at 10:30 pm. Everyone must check out by 12:00 noon on July 26.

Partner hotels are assigned on site and include Elong Hotel (Hangzhou West Railway Station / First Affiliated Hospital area), 2851 Yuhangtang Road, and Vienna International Hotel (Hangzhou Future Sci-Tech City).

Hupan also has participant rest zones with tents and reused sleeping bags. The quiet nap area on Floor 2 has mats and no coding zone.

Getting to the venue

The event starts at 10:00 am on July 22 and finishes by 8:30 pm on July 26, excluding the music festival. Arrive July 21 or the morning of July 22; leave the evening of July 26 or morning of July 27. Accommodation is not provided for the nights of July 21 or July 26.

Hangzhou West Railway Station is only 2.6 km from Hupan. From Hangzhou Xiaoshan International Airport, Hupan is about 50 km away: Metro Line 19 toward Tiaoxi, 14 stops to Chuangjing Road, transfer to Line 5, one stop to Liangmu Road, Exit A, then about 20 minutes on foot. A taxi takes about 50-60 minutes.

Transport comparison

Origin	To Hupan	To Academic Center	Cost
Hangzhou East	Line 19 → 5 · ~50 min	Line 19 · ~35 min	¥7
Hangzhou Station	Line 1 → 5 · ~60 min	Line 1 → 19 · ~50 min	¥7
Hangzhou South	Line 5 · ~70 min	Line 5 → 19 · ~60 min	¥8
Xiaoshan Airport	Line 19 · ~80 min	Line 19 · ~65 min	¥9 / taxi ¥120-150

2. Schedule and special events

First-day action plan - July 22

Participants

- Go first to the Academic Exchange Center: signature-wall photo and Super! Exhibition from 10:00 am.
- Then go to Hupan: finish participant check-in, collect materials and badge.
- Attend the opening ceremony at the Academic Exchange Center from 7:00-10:30 pm. Hacking officially begins afterward.

Visitors

- Go directly to the Academic Exchange Center; entry is free and no participant check-in is required.
- Register in United Portal for a QR. To enter Hupan, exchange the QR for a visitor badge.

Partners and mentors

- Go directly to the partner check-in desk at the Academic Exchange Center.

Detailed dates

- July 22, 10:00 am-11:30 pm: check-in. Check-in must be completed that day or the seat may be cancelled. Force-majeure cases may request an extension to July 23 at 3:00 pm with evidence; work or tourism is not an acceptable reason.
- July 22, 7:00-10:30 pm: opening ceremony; doors open at 6:10 pm. The theme, tracks and rules are announced. Hupan is closed during the ceremony and participants should attend the full ceremony.
- July 23, 1:00 am: hardware lab opens at Endpoint G.
- July 23-25: hacking runs 24 hours at Hupan; workshops happen mornings/afternoons and side activities in late afternoon/evening.
- July 25, 12:00 noon: project submission opens.
- July 26, 1:00 am: project submission closes. Work submitted later is not judged.
- July 26, 9:00 am-3:00 pm: participant Project Expo at the Academic Exchange Center. 9:00 am-noon is for judges and invited guests; noon-3:00 pm is public. Clear all materials by 3:30 pm.
- July 26, 5:30-8:30 pm: closing ceremony and awards.
- July 26, 8:30-10:00 pm: Woodstock Music Festival; both venues close at 10:30 pm. A separate activity page lists a 7:30-9:00 pm music slot, so follow the latest on-site notice.

Super! Exhibition

Super! is a large exhibition with 100+ technology companies and communities. It is not the participant coding booth. It runs July 22-25 from 10:00 am; it closes at 4:00 pm on July 22 and 6:00 pm on other days. The participant project Expo is on July 26.

Five-day overview

Date	Morning	Afternoon	Evening	Late night
7/22	Check-in / exhibition	Exhibition	Opening	Overnight coding
7/23	Workshop	Side activities	Side activities	Overnight coding
7/24	Workshop	Side activities	Side activities	Overnight coding
7/25	Workshop	Side activities	Submission opens	Overnight coding
7/26	Project Expo	Closing / awards	Music festival	—

3. Workshops and side activities

Workshops

July 23

- 10:15-10:45 - You already know spatial apps if you can build apps. PICO OS 6 lowers the complexity of spatial development; Android skills are enough to begin. Speakers: Nan Ye, Randal Dong and Fu Long. Provider: PICO. Hupan Commune; first come, first served.
- 11:00-12:00 - Why your Agent stops halfway: Prompt Leverage. Designing a loop that plans, executes, validates and corrects itself. Prompt Leverage = effective tokens consumed by the agent / characters in the human prompt. Speaker: Xia Zhenhua, Alibaba Qoder senior technical expert. Hupan Commune.
- 13:30-14:00 - Simulating a soul with StepFun. Configure the open-source AIRI agent with StepFun multimodal, ASR and TTS models so a virtual character can see, hear and speak in real time. Speaker: Wang Yuewei. Provider: StepFun.
- 14:15-15:15 - Agent experiments that grew into whole projects. Three unusual but real stories: an agent that designed a circuit board and refactored its design software, ontology-driven coding, and a team that built a new keyboard. Speakers: Cao Aman and Da Mao. Provider: Amazon Web Services.
- 15:30-16:30 - Lingguang App and viral content in the AGI era. Why interactive, clickable AI-native apps may become the next content medium. Speaker: Su Zhongyuan; support by Xu Fanfei. Provider: Lingguang / Ant Lingguang.

July 24

- 10:15-10:45 - New value of community co-creation in the AI era. How high-value communities generate ideas and use resources to take projects from zero to one. Speaker: Lao Mai, founder of SSPAI.
- 11:00-11:30 - From maker to founder. Commercializing technical ideas, four investor evaluation standards and startup examples. Speaker: Lan Dan, Mingyue Lake / XbotPark mentor and angel investor.
- 13:30-14:00 - From Demo to Deal: honest questions with a VC. Open AMA about real demand, users, teams, fundraising, product differentiation and balancing school with entrepreneurship. Speaker: Fu Qiang (John), investment partner at BlueRun Ventures.

July 25

- 11:00-12:00 - PandaAI Quant Workshop. Learn factors, build a strategy and back-test a first AI quantitative-investing experiment. No finance-expert background is required. Speaker: Li Bubai, PandaAI founder and CEO.

Side activities

- Song brocade and Miao silver refrigerator magnet: July 23, 4:30-5:30 pm or 6:15-7:15 pm, Hupan Commune. Make a small piece of intangible-cultural-heritage craft in about 30 minutes. Maximum 45 per session; visitor QR and badge required.
- OFFENBAR Open Flow - electronic meditation night: July 23, 9:00-11:00 pm, lower plaza on Floor 1 of the Academic Exchange Center. Techno Live, guided breathing and social space. No alcohol; first 60 registrants receive a special non-alcoholic drink. Visitor QR and badge required.
- Goushi offline academic conference: July 24, 4:30-8:00 pm, Hupan Atrium and Commune. Forty-eight papers across eight tracks; poster voting followed by 5-minute oral presentations and 2-minute Q&A. Capacity: 48 presenters and 150 reviewers with special wristbands.

- Fuqi Stand-up Comedy - Laugh Party: July 24, 9:00-10:00 pm, Hupan Commune. Stand-up and improvisation; capacity 100, first come, first served. Visitor QR and badge required.
- Woodstock Music Festival: July 26 at the Academic Exchange Center. A charity rock event inspired by peace, human progress and social solidarity. Bring an instrument if you want to join. Singers, rappers and DJs may contact the organizer; public entry does not require an admission QR.

4. Information channels

Useful links and official channels

- Official website: <https://adventure-x.org>
- United Portal: <https://united.adventure-x.org>
- Discord: <https://discord.gg/4stjHm73m>
- Feishu Xiaohuo account binding: <https://applink.feishu.cn/T97Wqq9d6J8m>
- Some linked sub-guides are still 2025 versions and will be updated for 2026.

Xiaohongshu

Search AdventureX on Xiaohongshu for concise participant benefits, booths and judges. At least one member of every project team must have a Xiaohongshu account. At submission, publish a project-introduction image post or video and enter its link in United Portal. It will appear in the AdventureX online exhibition.

Feishu groups

- AdventureX: general group for visitors, partners, participants and mentors.
- AdventureX 2026 Creators: participant-only group. Bind United Portal through Xiaohuo to join automatically.
- AdventureX 2026 Important Notices: monitor this group carefully.
- Separate groups are created for workshops and tracks; track groups open after tracks are announced.

5. Themes, tracks and challenges

AdventureX 2026 has five themes and dozens of partner-provided tracks. A team selects exactly one theme and one to six tracks.

- Themes and tracks are not announced in advance; both are revealed during the July 22 evening opening ceremony.
- The final result must be a working technical product such as software, hardware, website, game or mini-program. An article, video, proposal or slide deck alone is not a completed project.
- Read each track requirement carefully. If the project substantially fails more than two chosen track requirements (or one if fewer than two tracks were selected), participants may be barred from AdventureX the following year.
- Some tracks require written questions, so reserve submission time.
- Partner challenges also open during the event and may offer cash rewards.

6. Technical support

Suggested technical preparation

Core development

- Python, Jupyter Notebook and command-line basics; basic HTML/CSS/JavaScript and Node.js.
- Data structures, front-end/back-end interaction, forms/data display, Git collaboration and API-request concepts.

AI and model work

- LLM fundamentals, prompt design and model/API calls; optional fine-tuning experience.
- Speech, text and image input; AI coding assistants; foundation models and function calling.
- CoreML and MPS where relevant.

Platforms mentioned in the guide

- Dify Agentic AI, MiniMax Agent and MiniMax Open Platform APIs.
- OpenAI-compatible LLM API skills, Amazon Q Developer, CAMEL-AI and ModelScope AIGC resources.
- PPIO APIs for popular open-source models; ClackyAI cloud full-stack development.
- RDK Studio, RDK X3/X5/S100 boards, hupdate/image flashing, SSH and drivers.
- Tuya Open, Nothing Glyph Matrix SDK, Android development and Agora RTC SDK.
- Familiarity with retail/e-commerce flows and API/plugin/enterprise-SaaS integration is useful.

Wi-Fi and network

The venues provide wireless Wi-Fi only; wired networking is not supported. Operators will strengthen mobile coverage. Account names and passwords will be announced during the week before the event. For high network demand, use Endpoints B and D.

7. Rules and project eligibility

Do not submit Dolly or any other project that was already built before the opening. Idea planning is allowed, but the implementation must begin on site.

These rules are mandatory. Violations can cancel gifts, subsidies, judging eligibility or future participation.

1. Do not deliberately photograph, record or publish information about Hupan students or teachers, especially the donor wall.
2. Check in at Hupan and collect the badge/materials by the final staff shift on July 22.
3. Participate only in AdventureX during the event period; do not split time with another concurrent event.
4. Wear the AdventureX badge at Hupan and in free hotels. Security may remove anyone without it.
5. Teams must have 2-4 participants, and each person may join only one team. Non-participants and mentors may not build the project for you.
6. At least one member must attend the July 26 Expo; to win an award, all team members must attend judging.
7. The project must be original. Not all code may be AI-generated; partial AI assistance is accepted. GitHub code is reviewed by 11:30 pm on July 26.
8. All project work must be completed on site. You may think about ideas beforehand, but may not start building or reuse a previous project. Violations can blacklist the whole team.
9. Only work and code submitted before 1:00 am on July 26 is judged.
10. Free hotel rooms rotate daily. Do not leave belongings; rooms are cleaned after departure.
11. Participant luggage may be stored in the self-service storage at Hupan. Travel light.
12. Spending too long away from the event may trigger a warning or removal of support such as hotel access.
13. No unauthorized flames, mosquito coils, explosive or high-temperature items.
14. Protect your property; AdventureX is not responsible for loss caused by negligence, theft or force majeure.
15. Do not fly drones indoors.
16. Online products must comply with Chinese law and have lawful intent and use.

Pre-built project self-check

- If most of the project was completed before the event, it is pre-built.
- Idea exploration and small trials are allowed only at the experimental level.
- A project connected to your company/startup product is considered pre-built.
- Adding a feature or PR to an existing project is pre-built.
- A genuinely changed product form may be accepted: for example, reusing agent knowledge to build a new robot rather than submitting the old software.

8. Submission, judging and prizes

Critical deadline: submission closes at 1:00 AM on July 26 - not 1:00 PM.

Submission checklist - deadline July 26 at 1:00 am

1. Upload the project code to GitHub and use the tag #adventurex2026.
2. One team member posts a Xiaohongshu image post (recommended) or video with #adventurex and #SummerBelongsToHackathons.
3. Prepare the product slide show for the Expo beginning at 9:00 am.
4. Complete the project description and any track-specific written questions.
5. Submit in AdventureX United Portal and list every team member; prizes use this record.

The submission form asks for: project name, one-sentence summary, detailed Markdown description, technologies, at least one image/video (first image is a 16:9 cover), one theme, up to six tracks, up to three teammates besides yourself, GitHub repository, Xiaohongshu post, optional live link and track-specific answers.

Judging

Judging happens during the Expo. Teams show the product to roaming judges and track partners. Prepare a 2-3 minute fast demo. Show the working product, not only slides. Even unfinished projects should still be demonstrated. All members must be present during judging to win.

Theme judging criteria

- Creativity: distinctive work that makes people say "wow" and want to share it.
- Technical complexity: strong architecture and advanced frameworks built within five days. Excessive AI-generated code may weaken this score.
- Social impact: potential to improve lives and positively affect the future.

Prizes

The guide describes prizes with a total value up to the million level. A team may win one theme prize plus as many as six track prizes. Awards may be delivered within one to six months after the event. Contact information may be shared with a track sponsor for fulfillment, and distribution follows the team list recorded in United Portal.

9. People around you

AdventureX is a nonprofit initiative mainly started and organized by students. Its organizers are called Builders; they are unpaid volunteers who typically contribute more than ten hours each week.

- Volunteers support check-in, workshops and side activities. Public volunteer recruitment has closed. Volunteers receive service certificates and may be prioritized for the next year's organizing team.
- Mentors include company CEOs, developers, designers and other creators. They also judge theme tracks on July 26 and provide feedback. Report a mentor who provides no constructive help and only negative comments.

10. Appendix

Food and snacks

Three meals and snacks are provided from July 22 through July 26.

- Breakfast: 7:30-8:30 am, Floor 2 dining area.
- Lunch: 11:30 am-1:00 pm, Floor 2 dining area.
- Dinner July 22: 5:00-6:00 pm.
- Dinner July 23-25: 5:00-6:30 pm.
- Dinner July 26: 3:30-5:00 pm.

Do not waste food. People who waste meals may lose snack and meal access for subsequent days.

Venue orientation

Hupan Innovation and Research Center hosts the hacking endpoints, dining area, workshop Commune, rest areas and quiet nap room. The Academic Exchange Center hosts the opening, closing, Super! Exhibition, Project Expo and music festival. Follow the on-site signs because final maps and room assignments may still be updated.
